The Power of Prediction

Prof. dr. Milan Petković Philips September 2023

Products come and go ... Technologies change ...

But Philips is still about one thing: Creating meaningful innovation that improves people's lives It is our purpose to improve people's health and wellbeing through meaningful innovation.

We aim to improve the lives of 2.5 billion people per year by 2030.*

Helping our customers address their challenges

Improved staff experience

Flagship innovations across our portfolio will drive our growth

IntelliVue

Dynamic care solution

Alarm fatigue: 40% total alarm reduction¹

Workflows: Reduced time to process from 5 minutes to 3.9 seconds²

- Team-Based Interventions to Reduce the Impact of Nonactionable Alarms in an Adult Intensive Care Unit. Justin Yeh 1, Ruth Wilson, Lufei Young, Lisa Pahl, Steven Whitney, Kevin C Dellsperger, Pascha E Schafer
- Results from baseline and post time & motion studies conducted by Philips and Jackson Health internal teams in the high acuity units (ED, TICU, CCU) | 2.

Flagship innovations across our portfolio will drive our growth

Philips BioTelemetry

4.6x more patients with atrial fibrillation detected by MCOT compared to ILR alone¹

8x lower costs achieved with improved detection rates and reduction of secondary stroke risk due to new anticoagulant use in subjects with MCOT-patch-detected atrial fibrillation¹

 Medic G, Kotsopoulos N, Connolly MP, et al. Mobile cardiac outpatient telemetry patch vs implantable loop recorder in cryptogenic stroke patients in the US – cost-minimization model. Med Devices (Auckl). 2021;14:445-458. doi:10.2147/MDER.S337142

Flagship innovations across our portfolio will drive our growth

MR

7

0 helium refill over lifetime

Up to 53% lower power consumption per patient scan (32% on average)¹

IntelliVue GuardianSoftware

Detecting early signs of patient deterioration in general care settings

IntelliVue GuardianSoftware with early warning scoring (EWS) automatically acquires patient vital signs, calculates an early warning score customized to the individual needs of the hospital, displays it at the point of care, and notifies responsible caregivers. A prospective study using Philips IntelliVue GuardianSoftware supports the use of an automated EWS system with notifications to provide improvements in key patient-centered clinical outcomes.

are (2017) 21: 52. doi:10.1186/s13054-017-1635-z

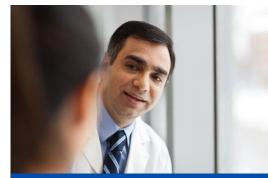

We combine the power of AI with deep clinical knowledge to create solutions that integrate into the workflows of healthcare providers and people's daily health routines.

Partnerships and new business models

Driving AI at scale through collaborative ecosystems

Long-term strategic partnerships

We innovate with leading medical centers to advance AI-enabled solutions around the globe

Integrating third-party Al offerings

We integrate validated thirdparty AI applications into our solutions for seamless workflow support

AI marketplace based on a cloud-based platform

We enable healthcare providers to easily implement AI apps into their workflows – including apps from third parties – via a common cloud-based platform

Key take-aways

- With AI, we can help people take better care of their health and wellbeing, and **enable healthcare providers to do what they do best**: prevent, diagnose, treat, and monitor
- For AI to support the human experience in healthcare, it needs to integrate into the workflows of healthcare providers and people's daily health routines
- Scaling AI in healthcare requires a human-centered approach, based on a strong foundation of trust – while promoting increased data sharing, interoperability, and ecosystem partnerships that enable seamless workflow integration
