

# No code for digital health

Digital therapeutics

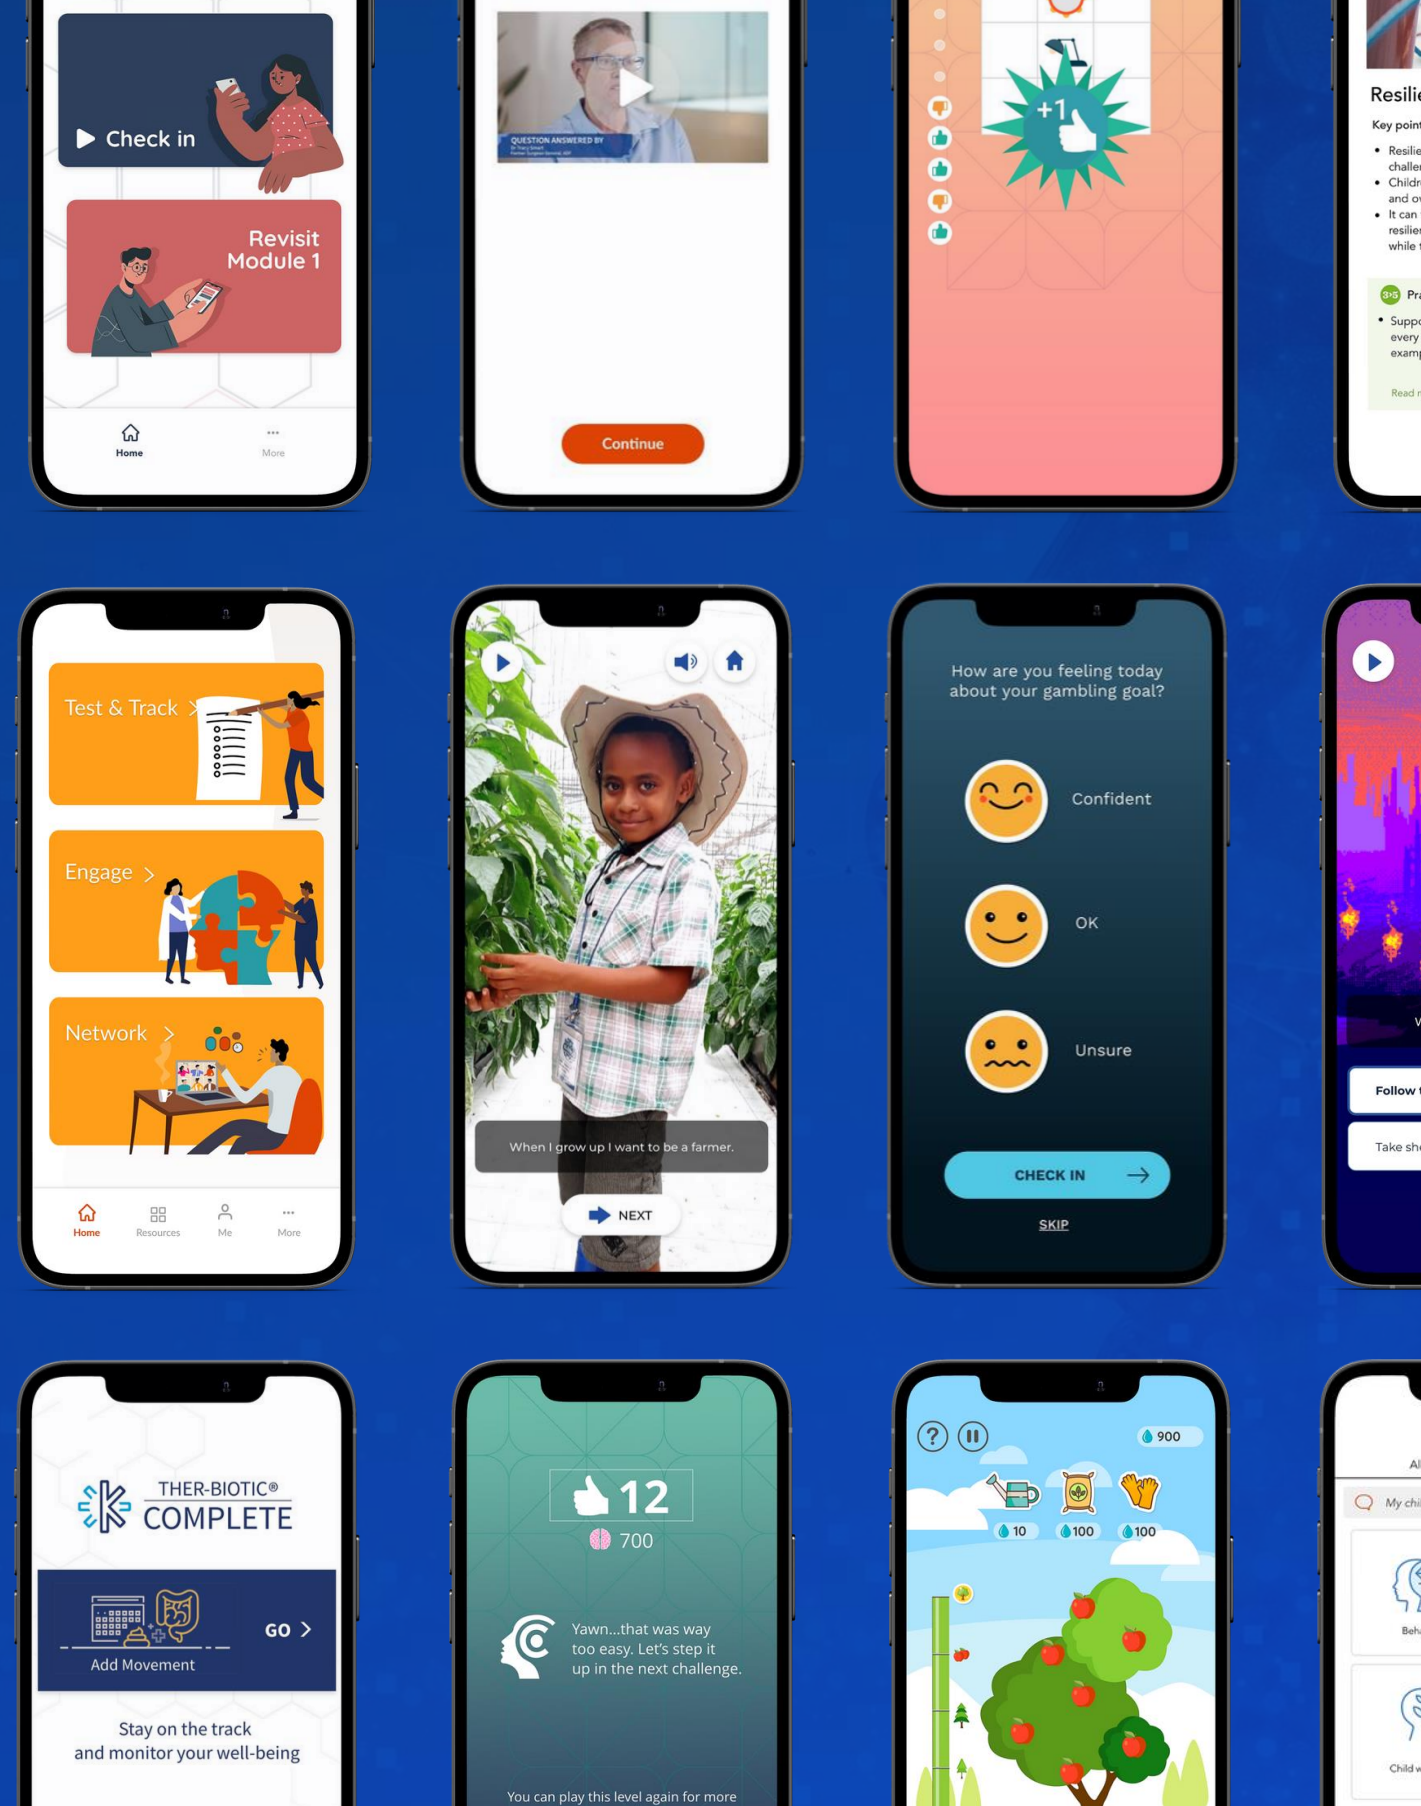

Assessment tools & diagnostics

Awareness & prevention apps

Real-world evidence tools

Formal research instruments

Wellness & consumer technology

## Digital health is the new frontier for healthcare

But nothing has changed in the way these technologies are created in 15+yrs....

### Long time to market

12+ months to design and develop first version of an app, long lead time to iterate

### Specialised skills required

Specialised people needed in UX design, development, AI, gamification, data security

### High lifetime cost

£170k – average initial development cost.

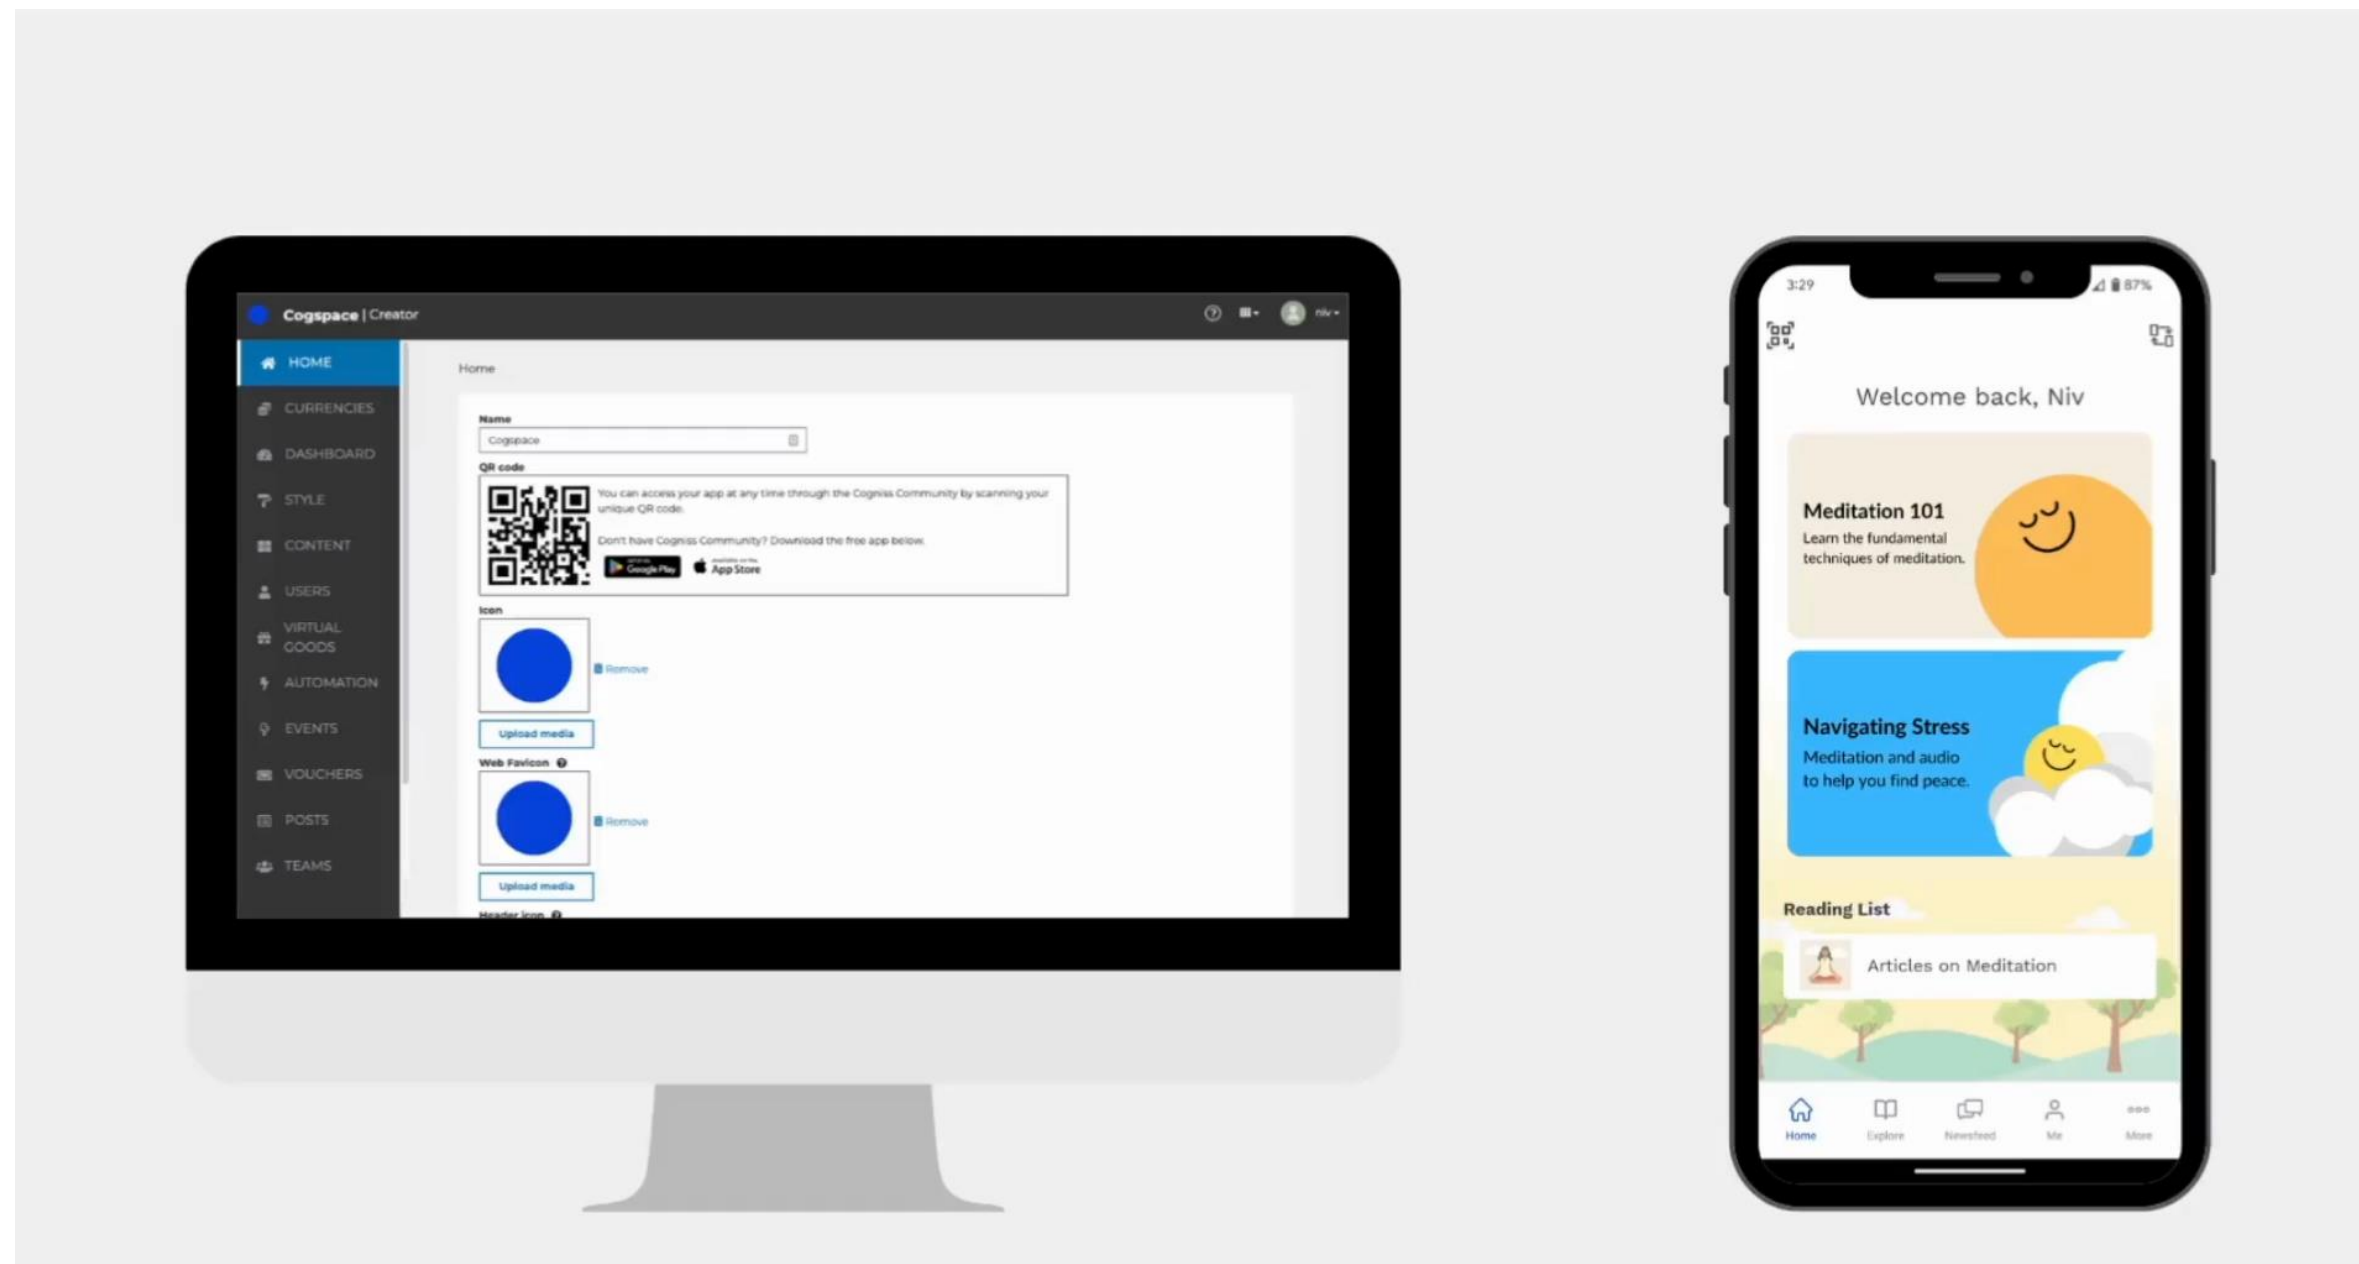

### Regulatory and compliance

Multiple regulations and compliance frameworks need to be met

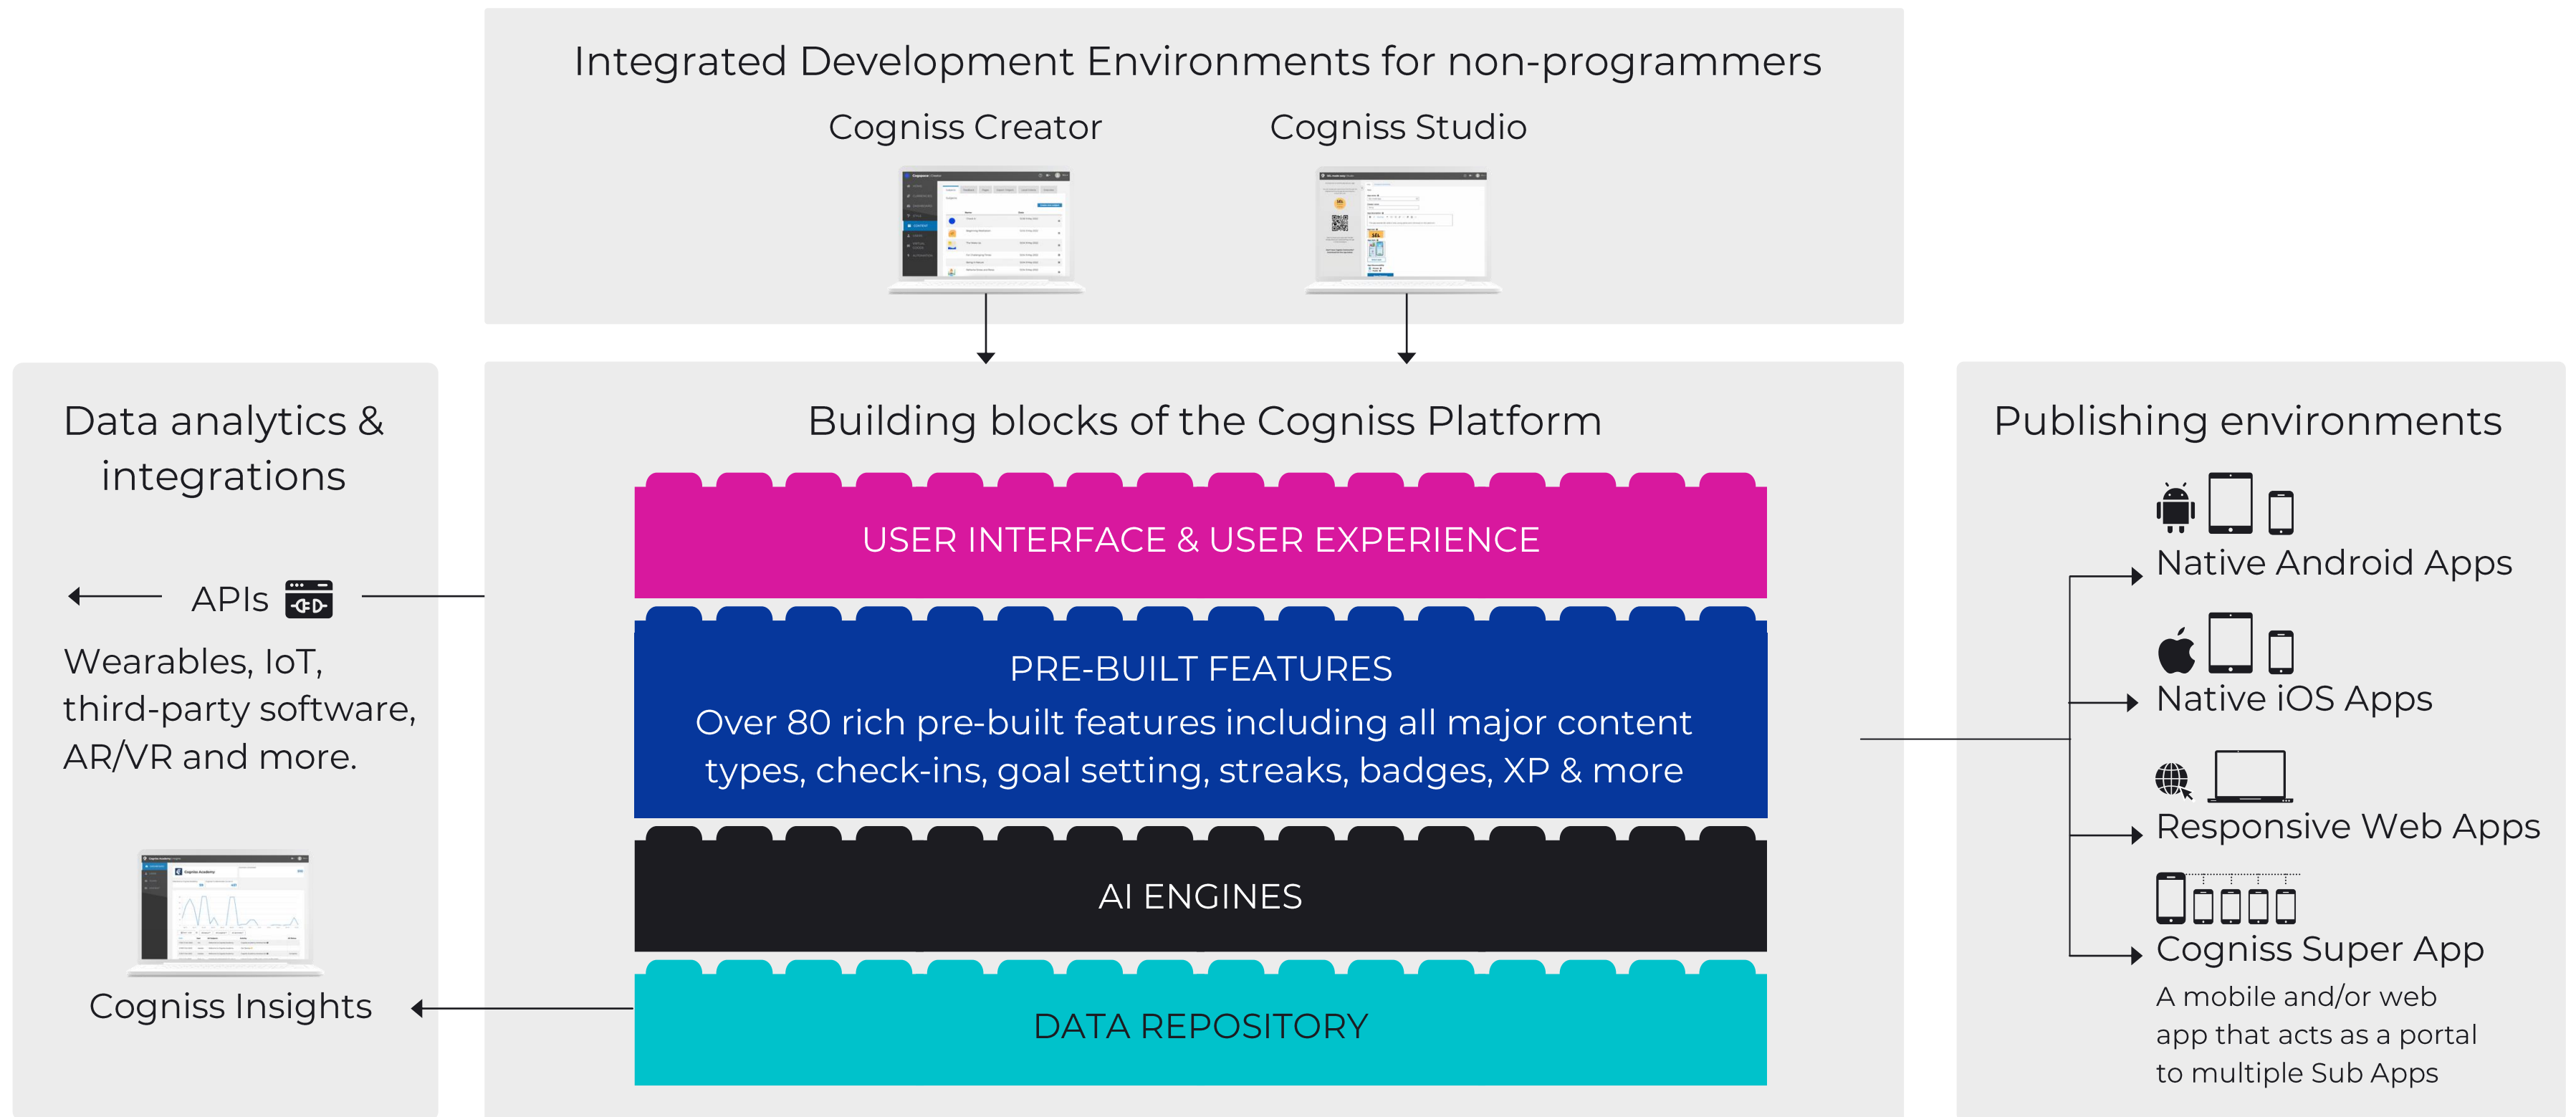

A digital health no-code application platform-as-a-service (aPaaS)  
To design, build, deploy and manage apps.
