

Delivering High Quality ML Models

In 2022...

85% of AI projects will yield erroneous results due to biases in the data, models or teams responsible.

Gartner®

**How do you prevent
quality issues?**

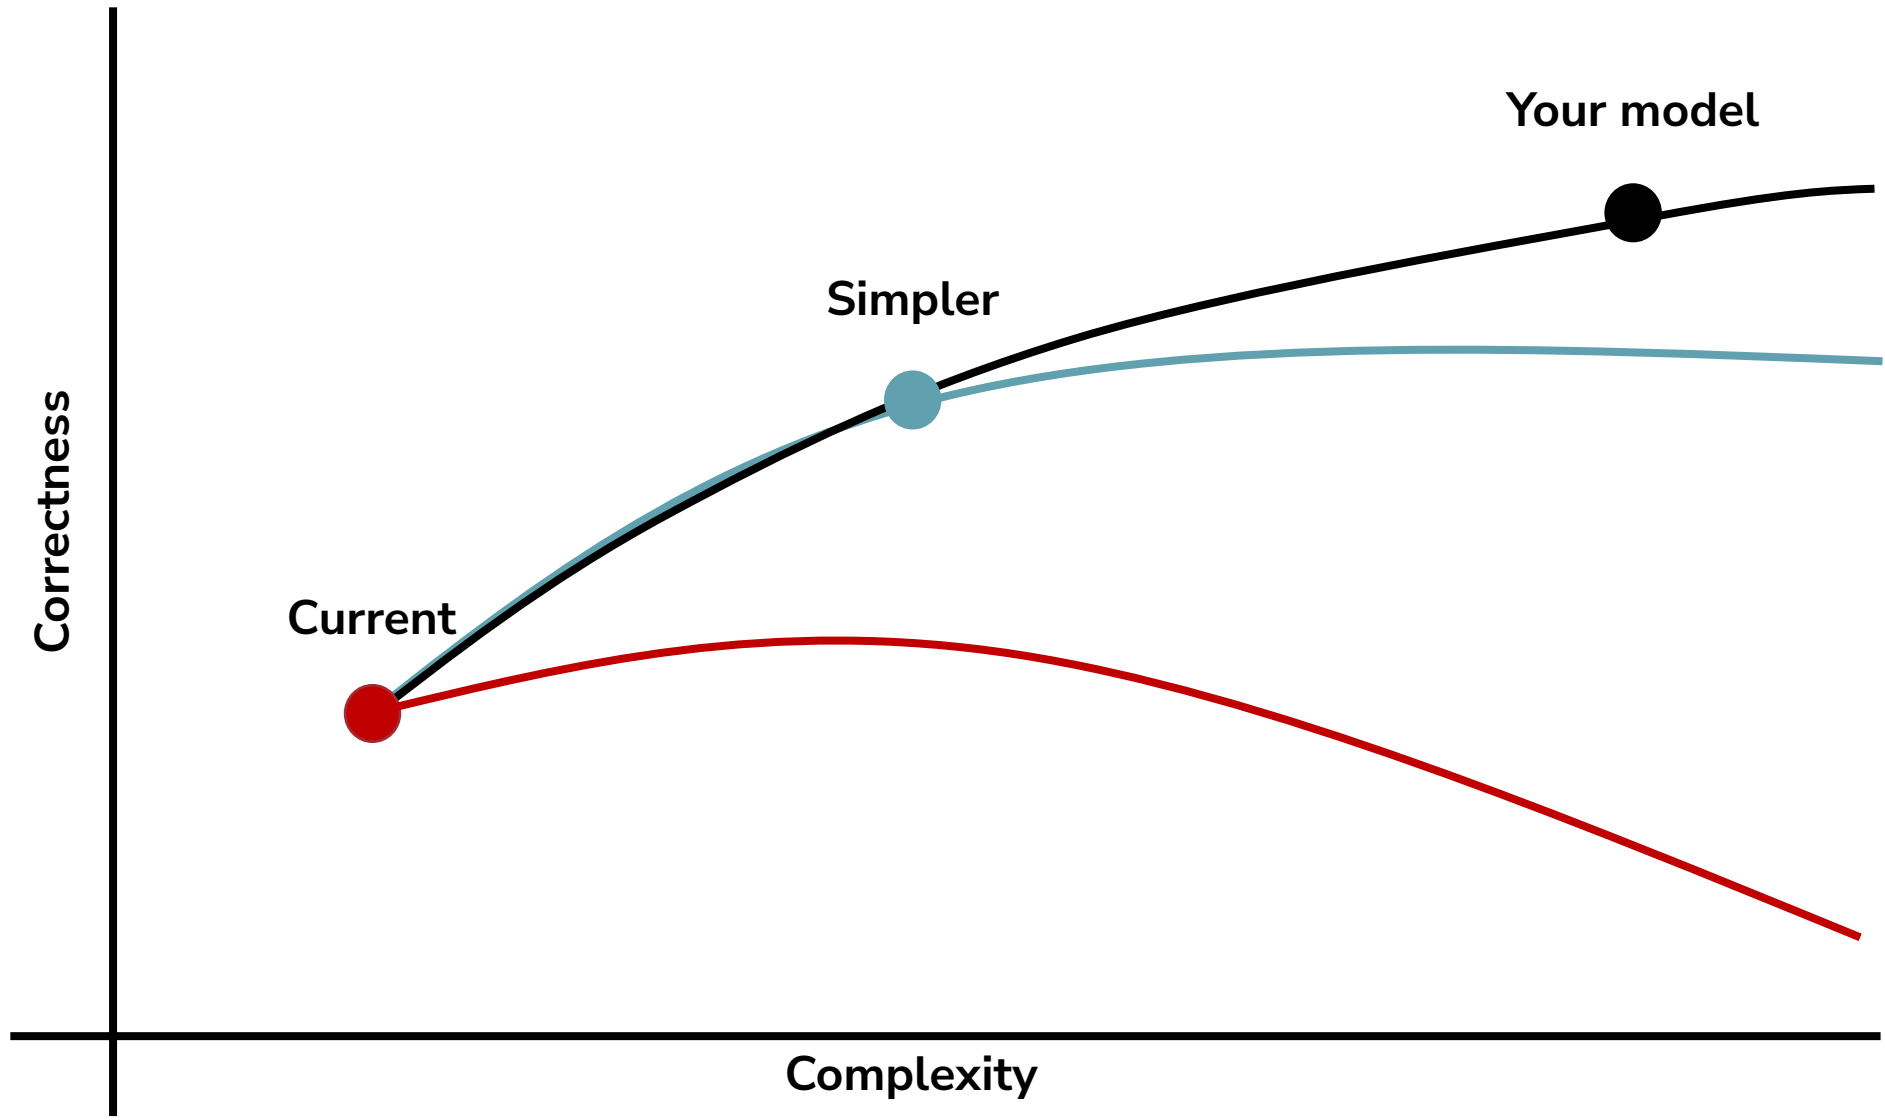

**What gets
measured
gets done.**

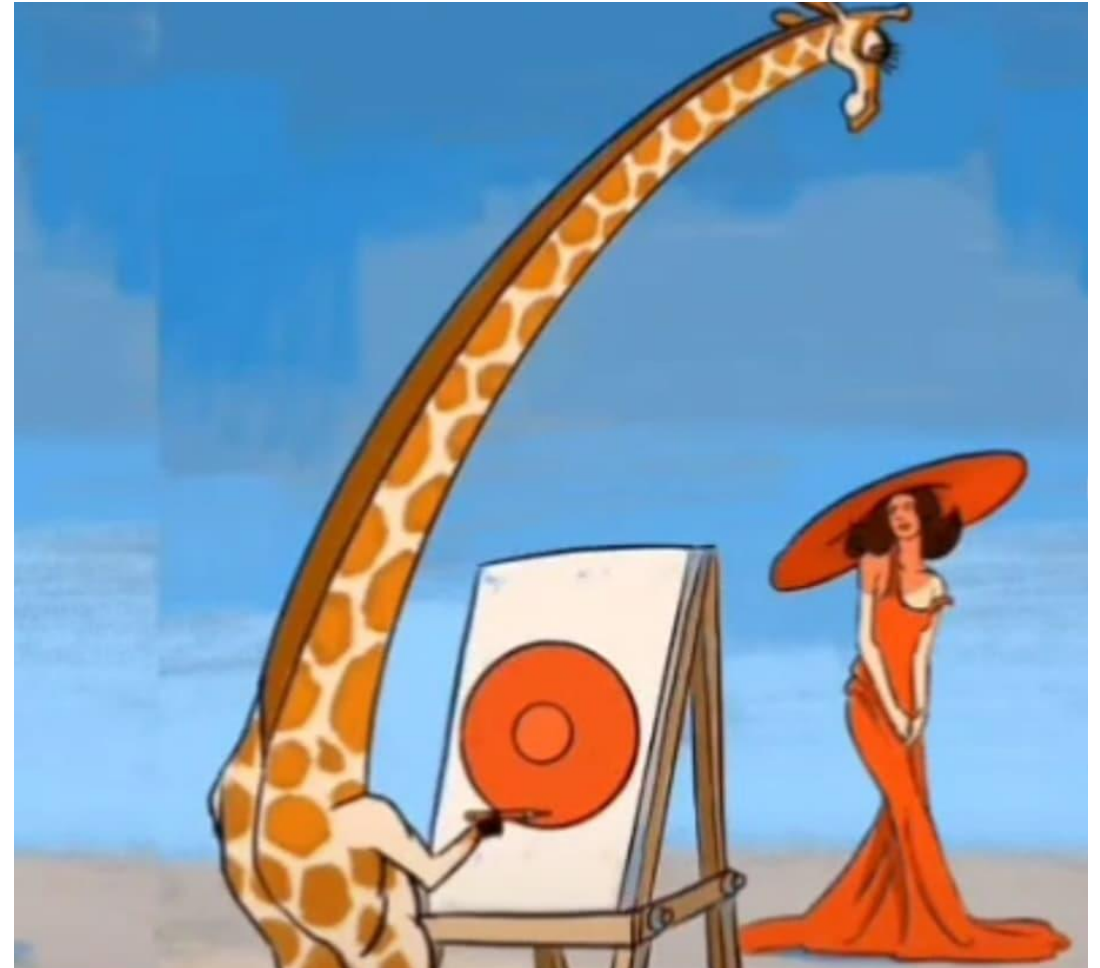

**Challenge
ignorance.**

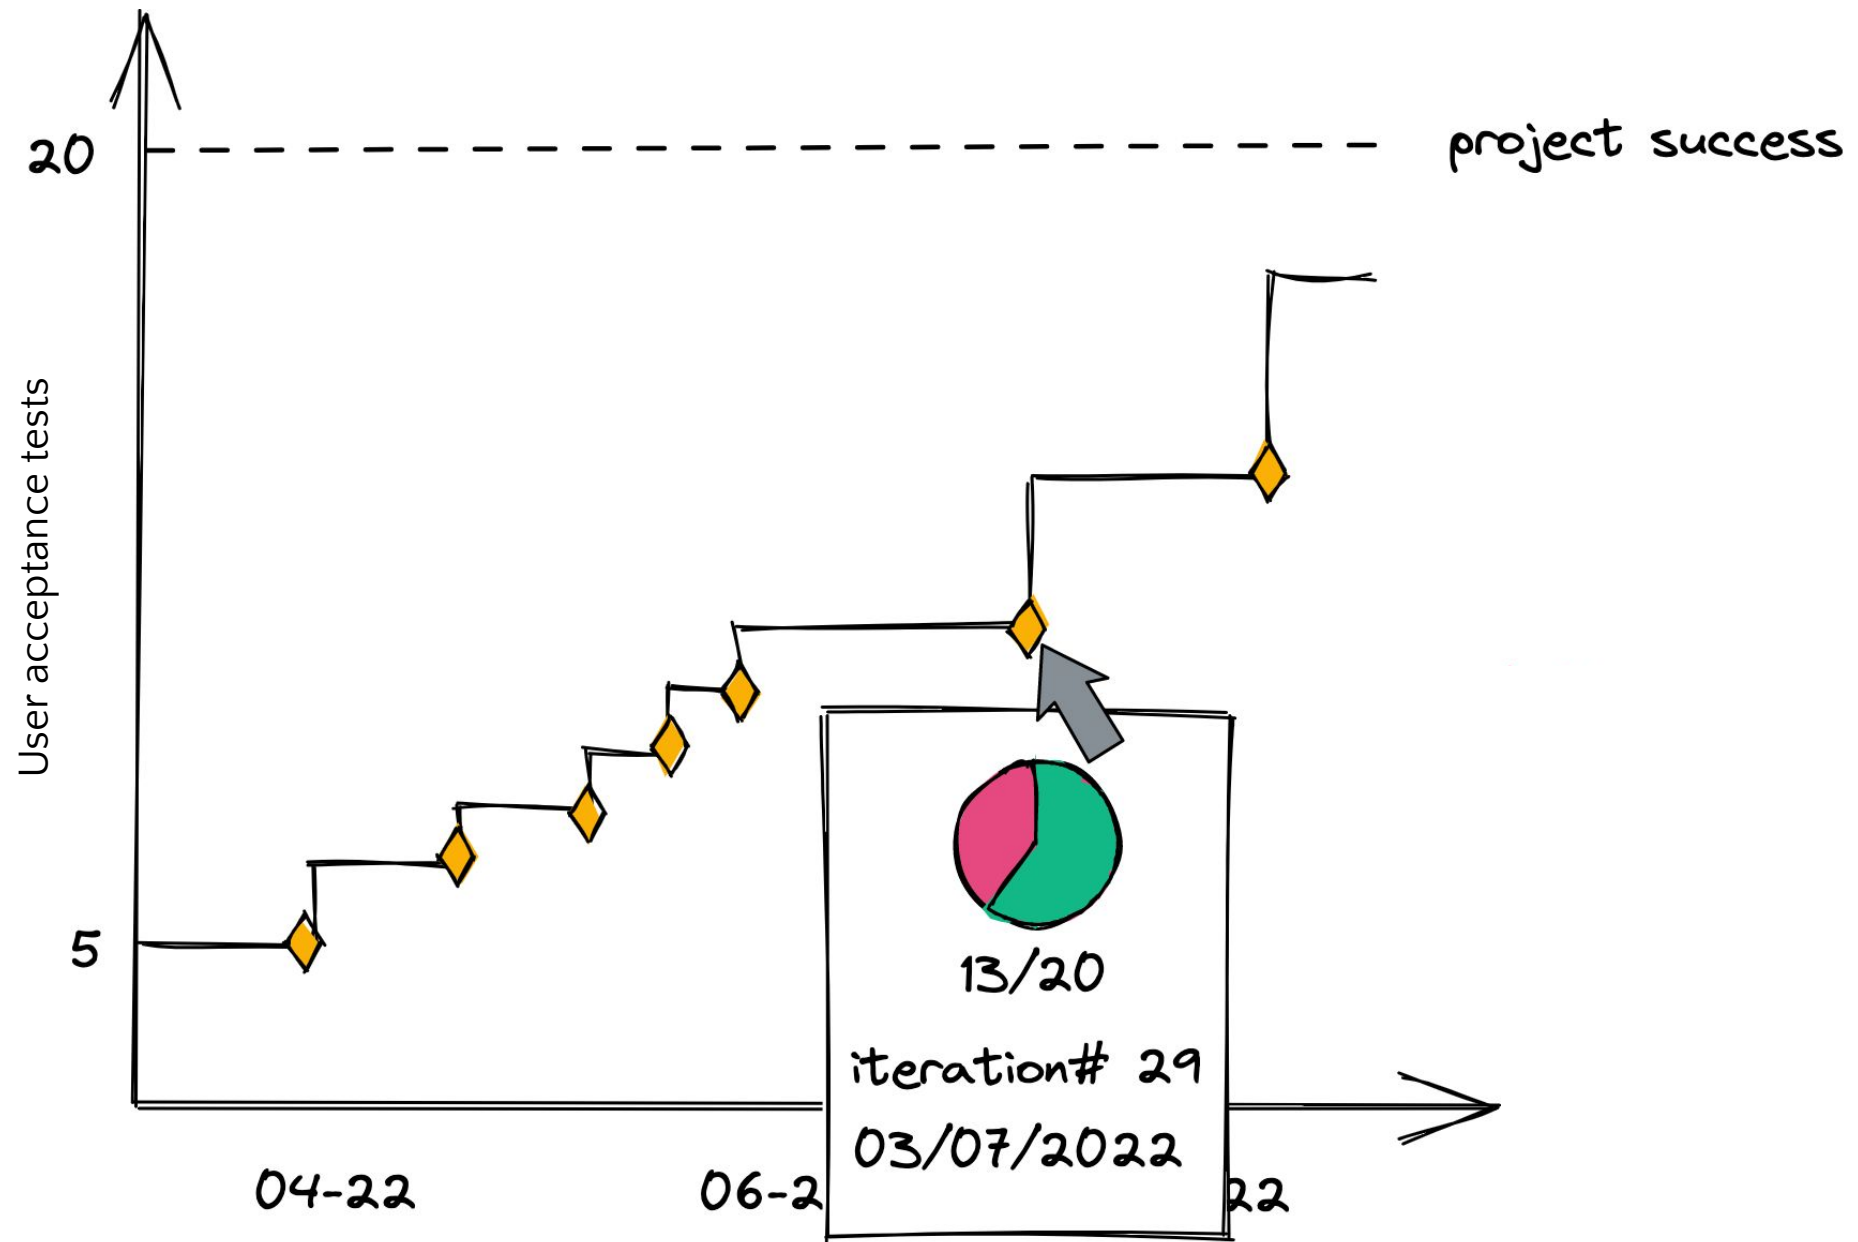

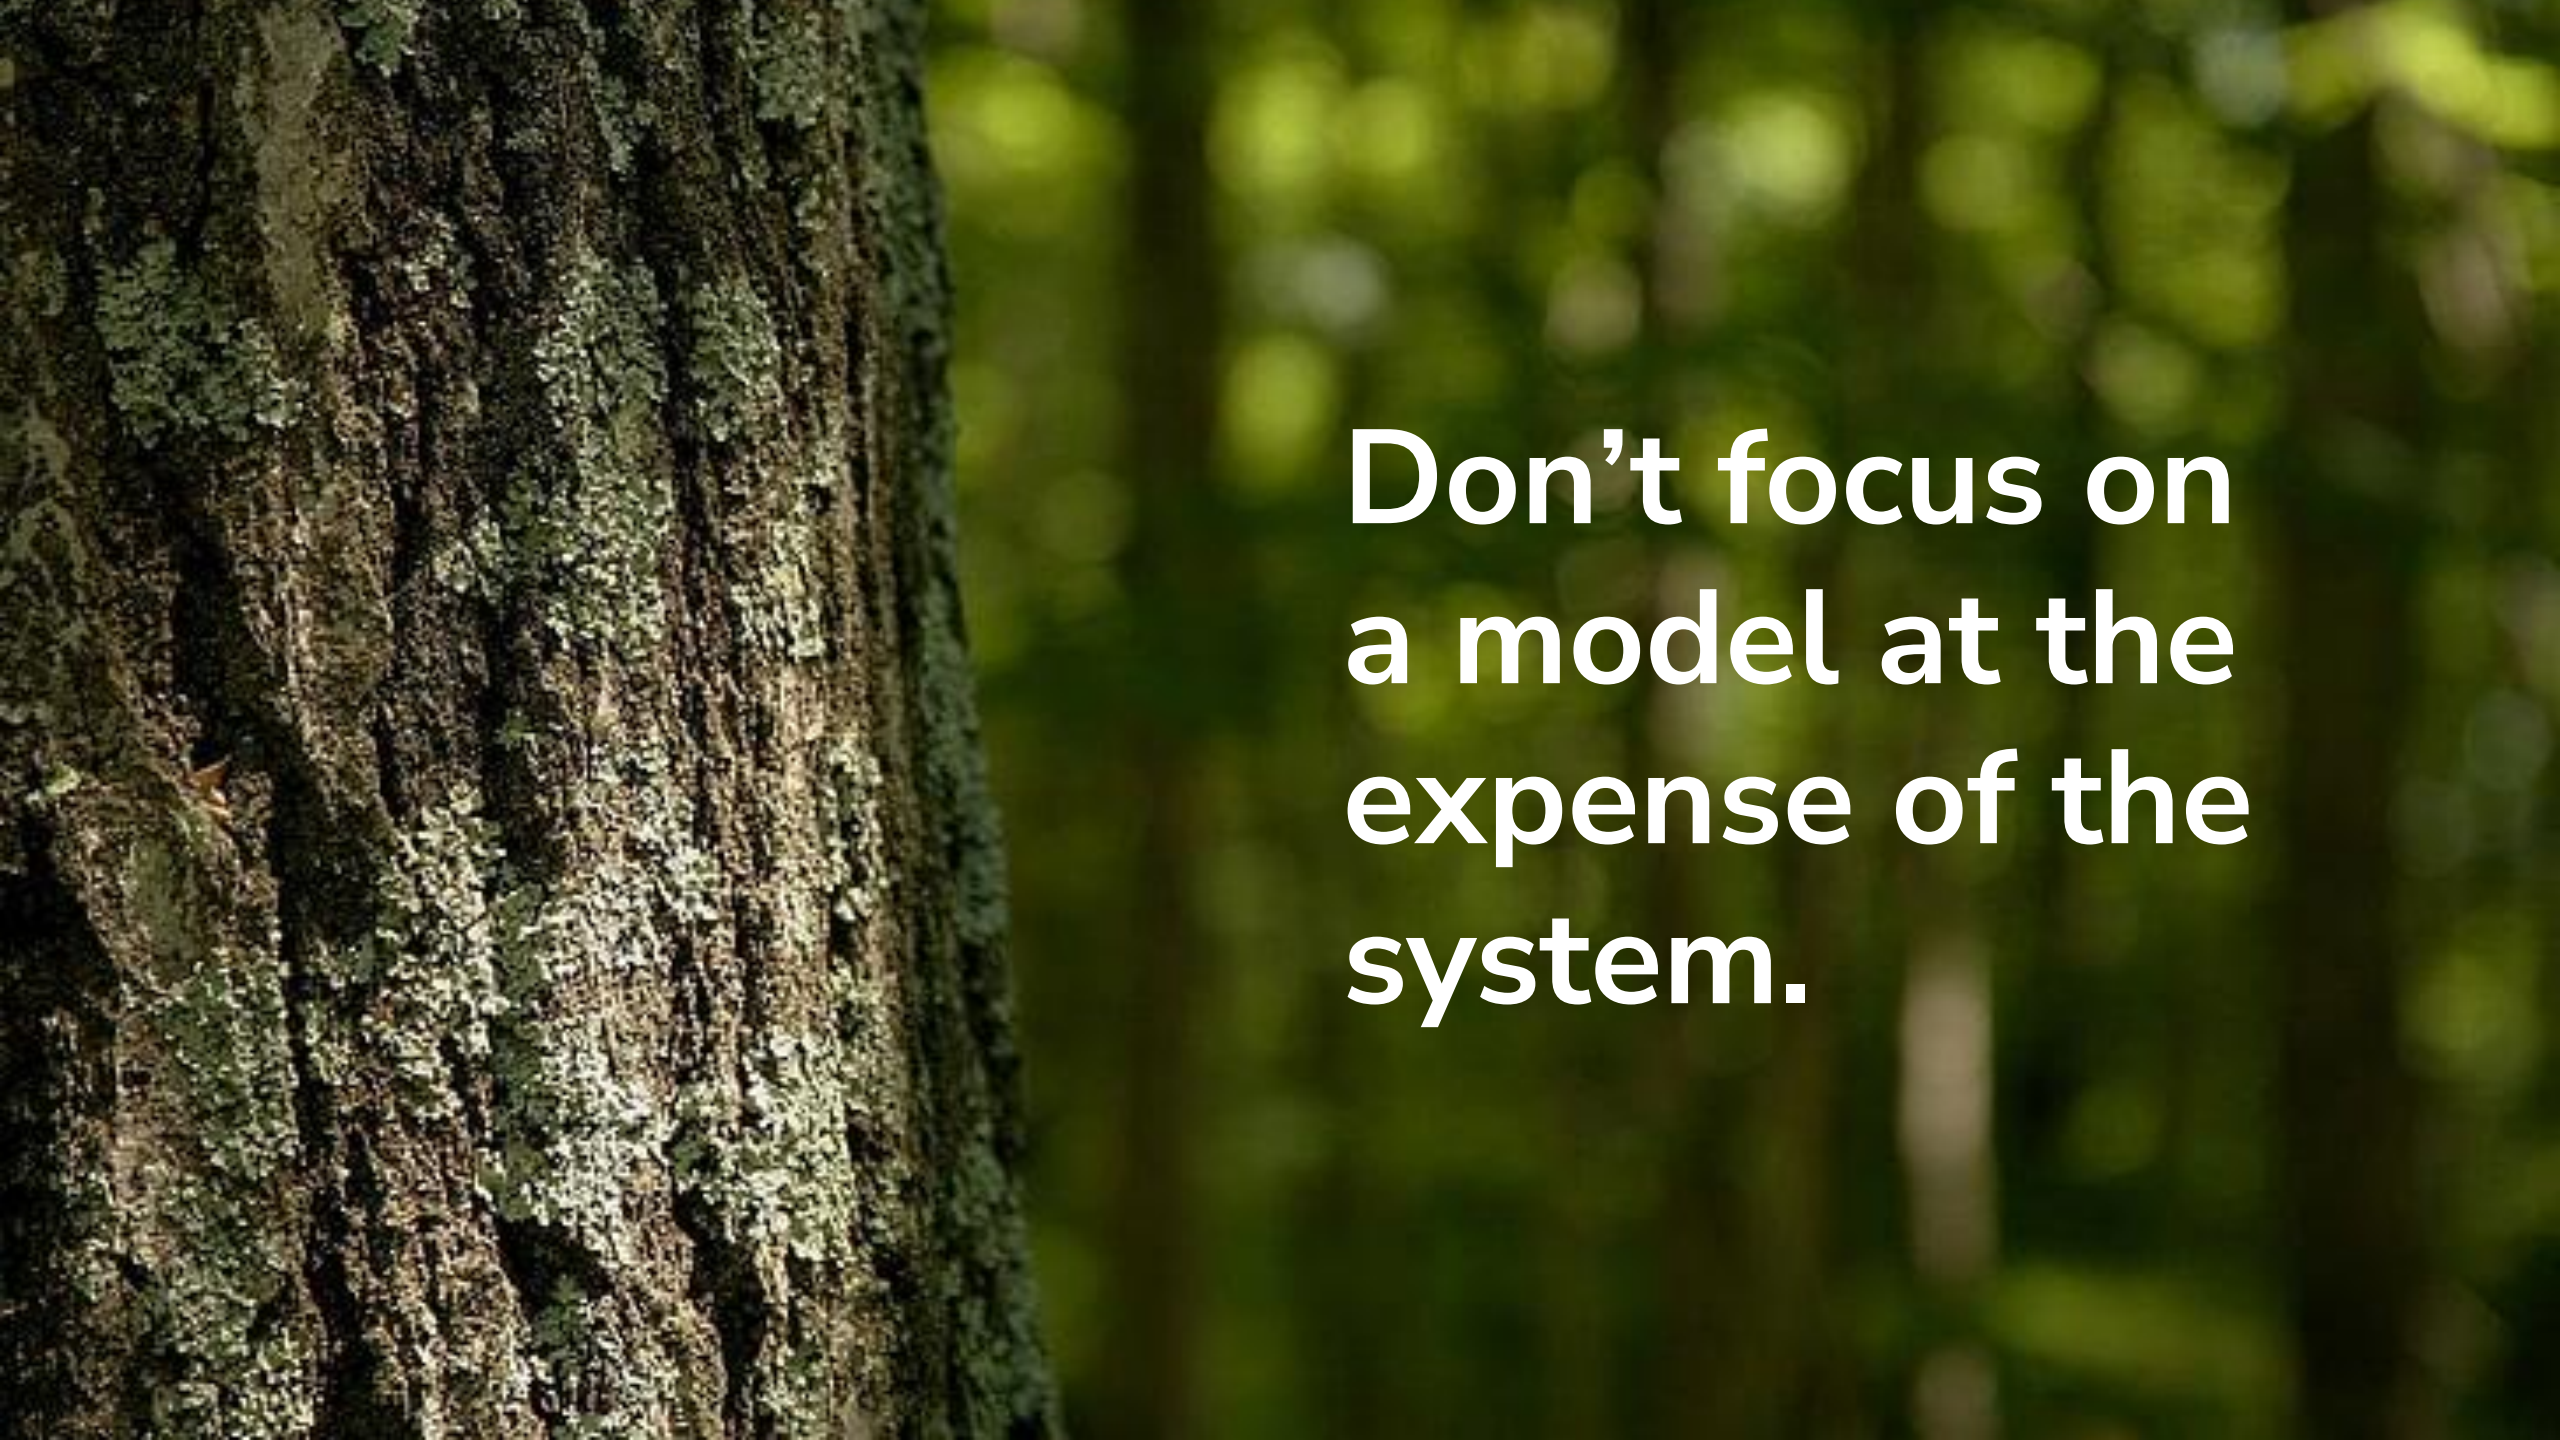

**Assess
from multiple
perspectives.**

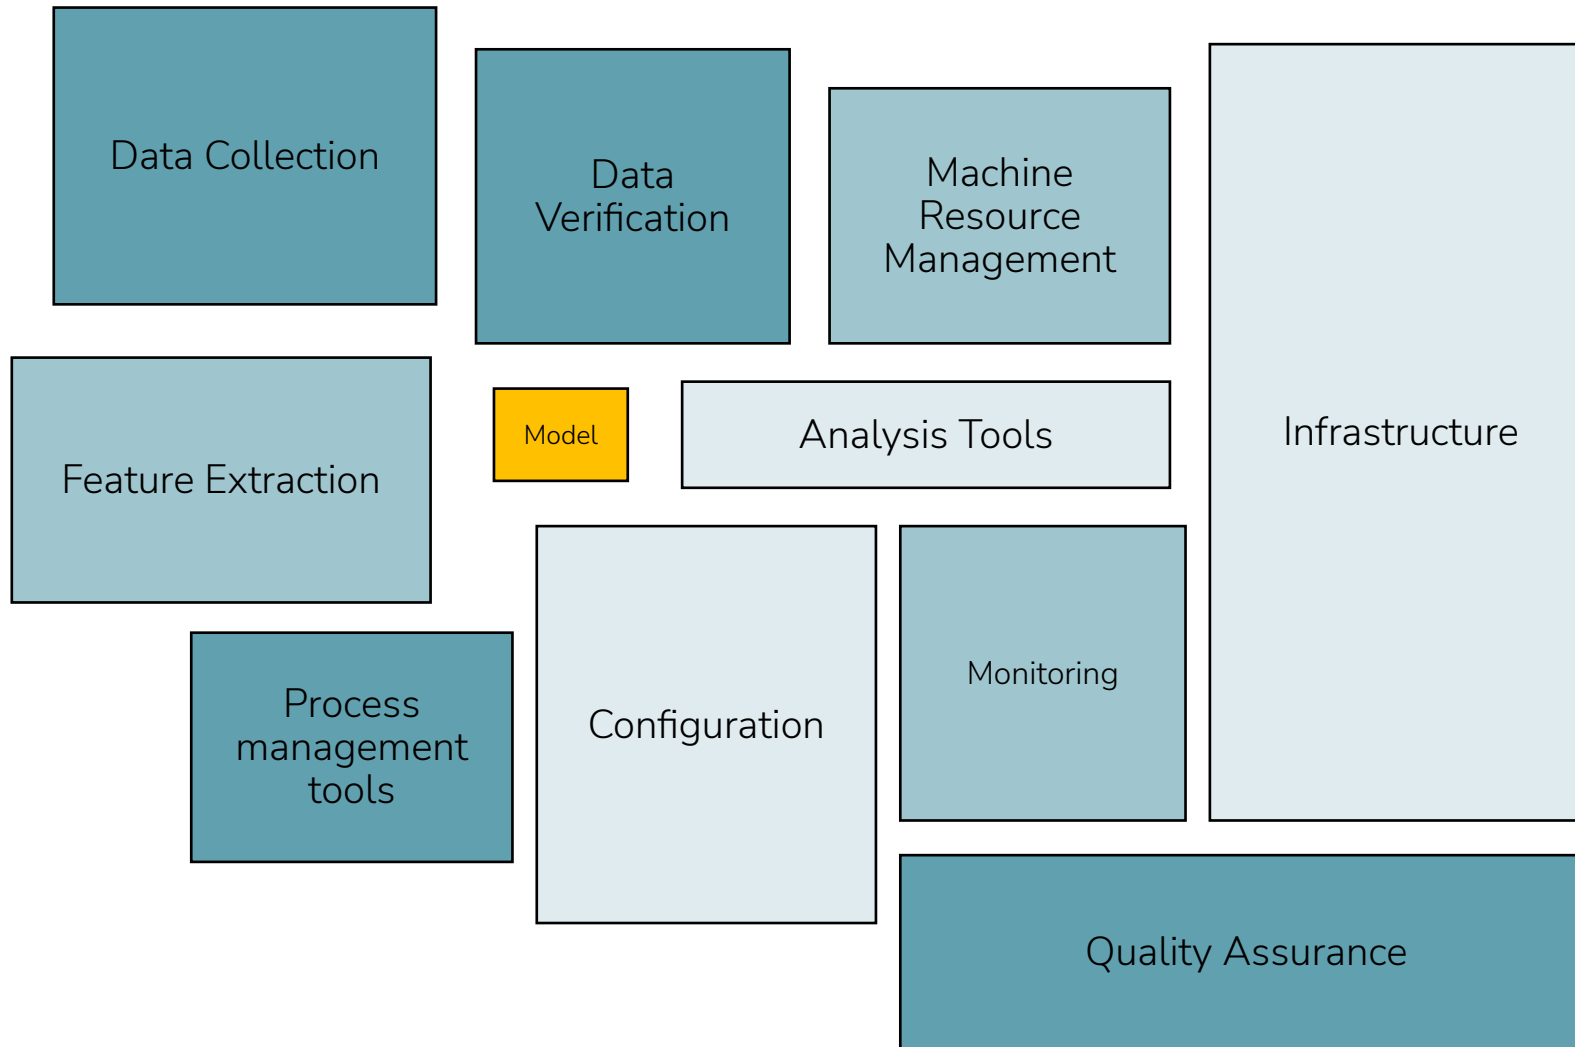

Accuracy: 90%

**Don't focus on
a model at the
expense of the
system.**
