

**Protect your real estate assets
with automatic diagnostic**

Protect your buildings

- Residential
- Office
- Hotel
- Hospitals & more

- Accelerate inspections of building exterior
 - Reduce safety risks for inspectors
 - Provide real-time predictions on and off site
- Detect potential defects proactively
- Reduce heating costs & carbon footprint

But what about the inside ...?

Building and equipment records sourcing from the inside

Stay up to date on the condition of your building and it's equipment

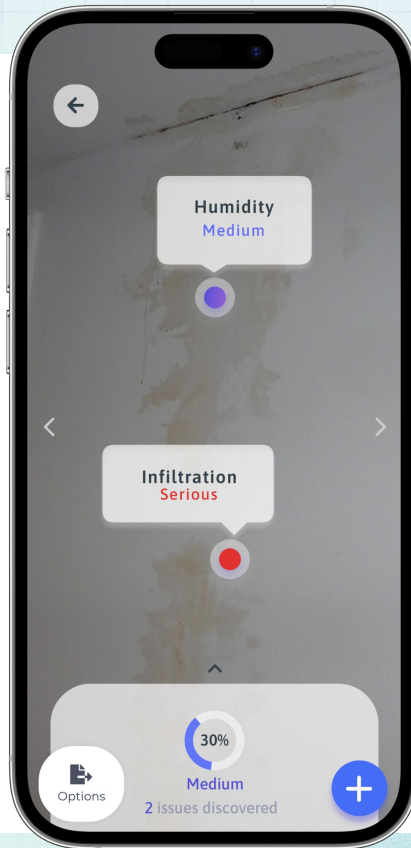

Connect owners, managers, occupants or tenants.

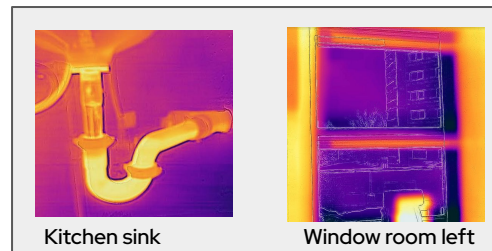

- Acquire footage and sound from the occupants
- Use automated diagnostics to make reliable decisions
- Streamline your apartment or office maintenance reporting

Building and equipment records sourcing from the inside

- Reference your problem-solving conversations
- Generate comprehensive reports instantly
- Streamline the annual inspection even with thermal imagery and AI powered predictive modeling

- Reduce your energy costs proactively detecting heat losses
- Provide a better customer experience to your tenants or occupants.
