

AI is here to **improve** **humanity**, not replace it

Trusted AI for Human-Centric Outcomes

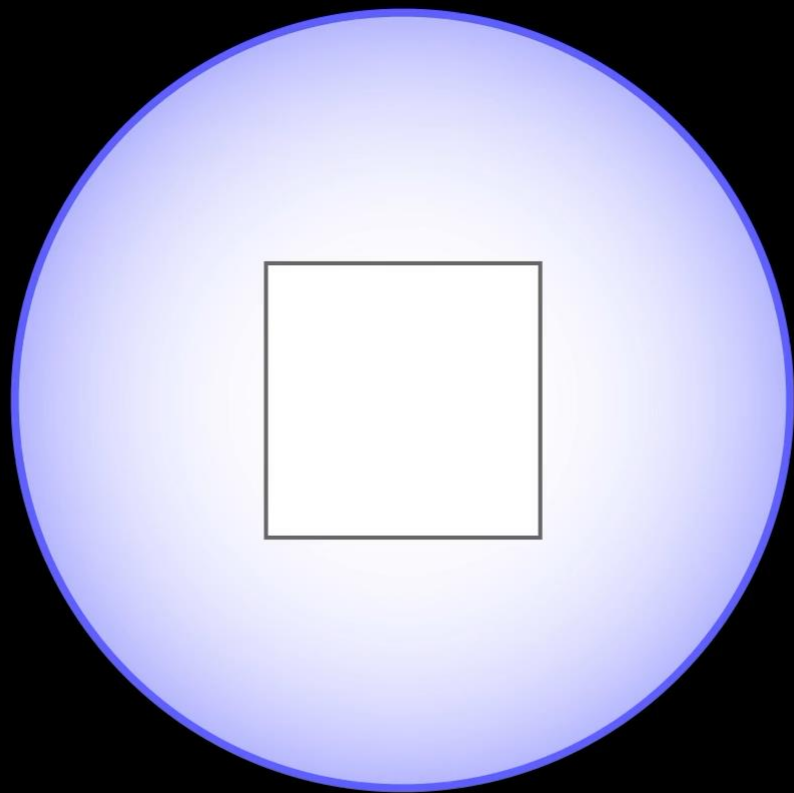

Sebastian Goodwin
VP, Chief Trust Officer, Autodesk

**As humans, we spend 90% of our lives in
designed spaces.**

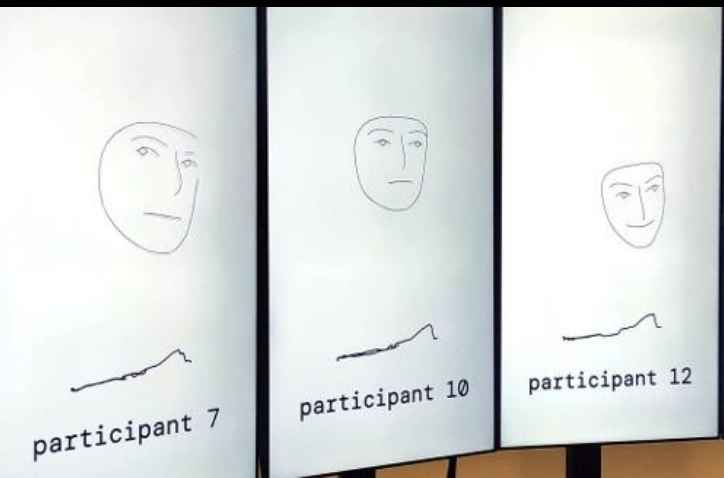

1. To capture human experience, we needed to gather multi-modal data streams.

2. The design process should also be collaborative.

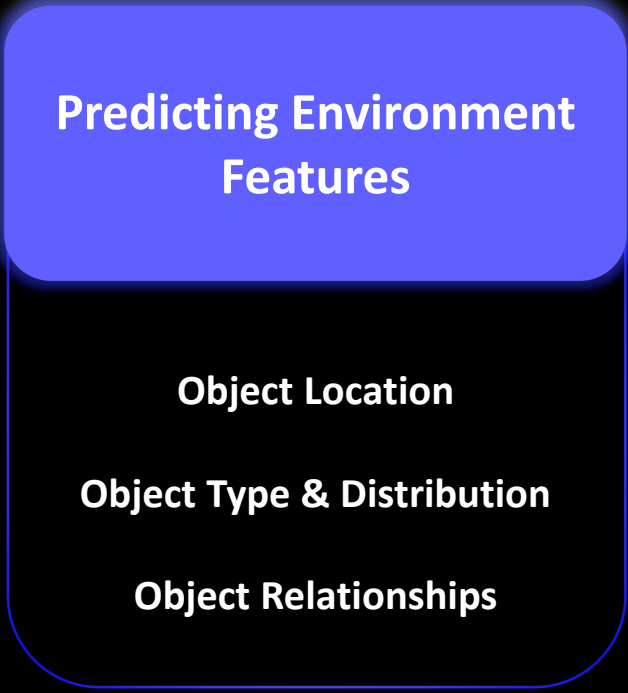

A large, stylized blue opening quotation mark.

I liked the semi-enclosed, tunnel-like experience.. even though it's concrete... I like that it is in part enclosed and you can't see the sky so readily... especially as a person who is concerned about skin cancer... If it's raining, you're sheltered. The Bentway is a natural umbrella.

The Bentway Participant

A large, stylized blue closing quotation mark.

Track carbon footprint of a building from planning through detailed design.

Predict areas with high-risk of flooding and key areas for stormwater controls and storage.

Identify and prioritize construction risk specifically around design, quality, safety and project management workflows.

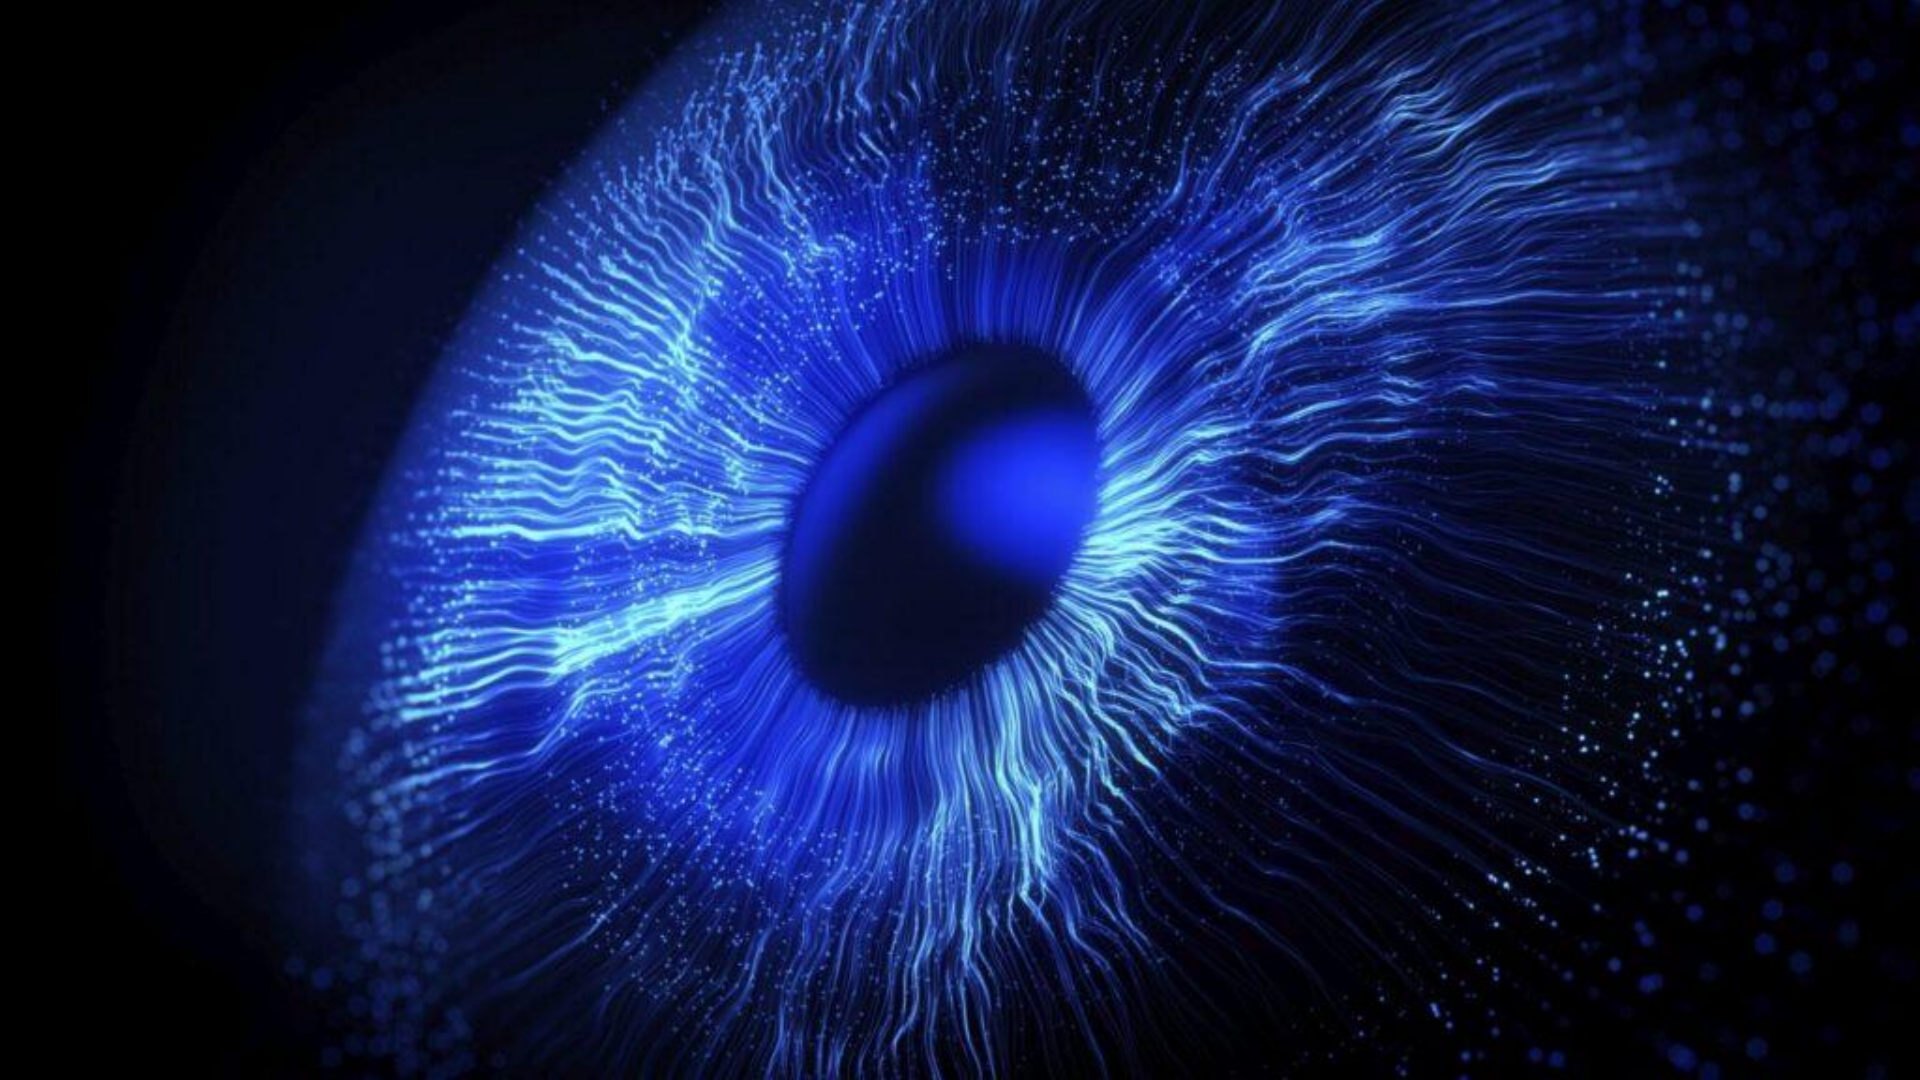

AI Principles

The background features a blue-toned network of white nodes and connecting lines, resembling a neural network or data flow. A robotic hand is visible at the bottom center, reaching upwards. The overall aesthetic is futuristic and technological.
