SINGLE APP
POTENTIAL SAVINGS

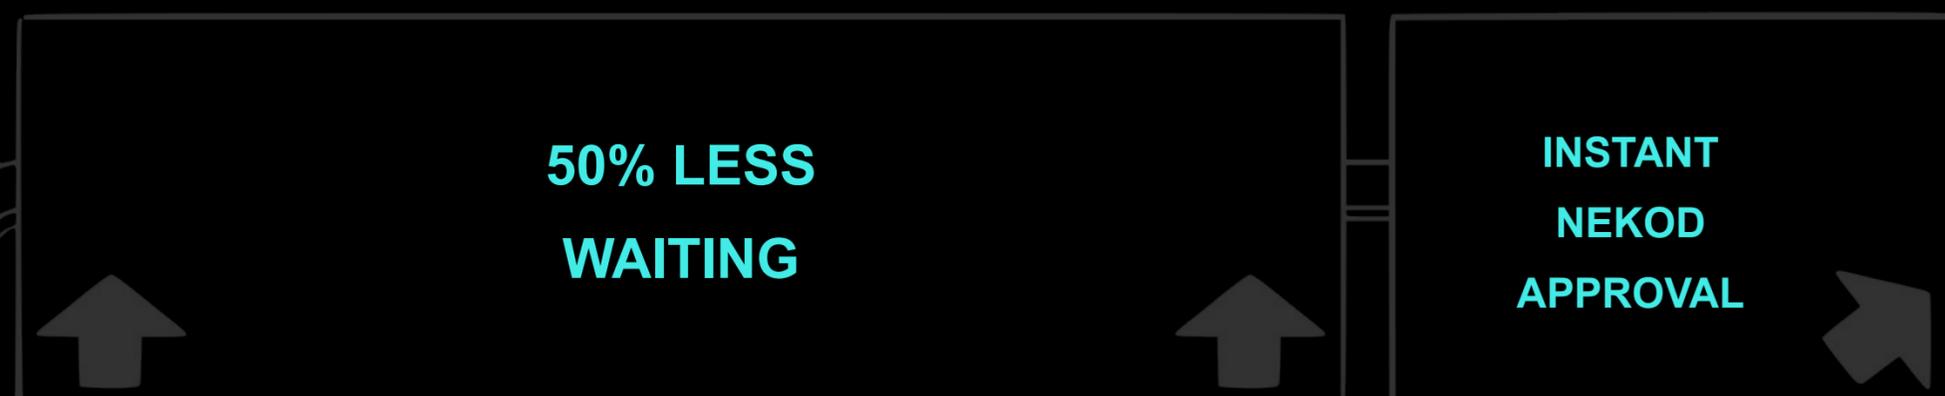

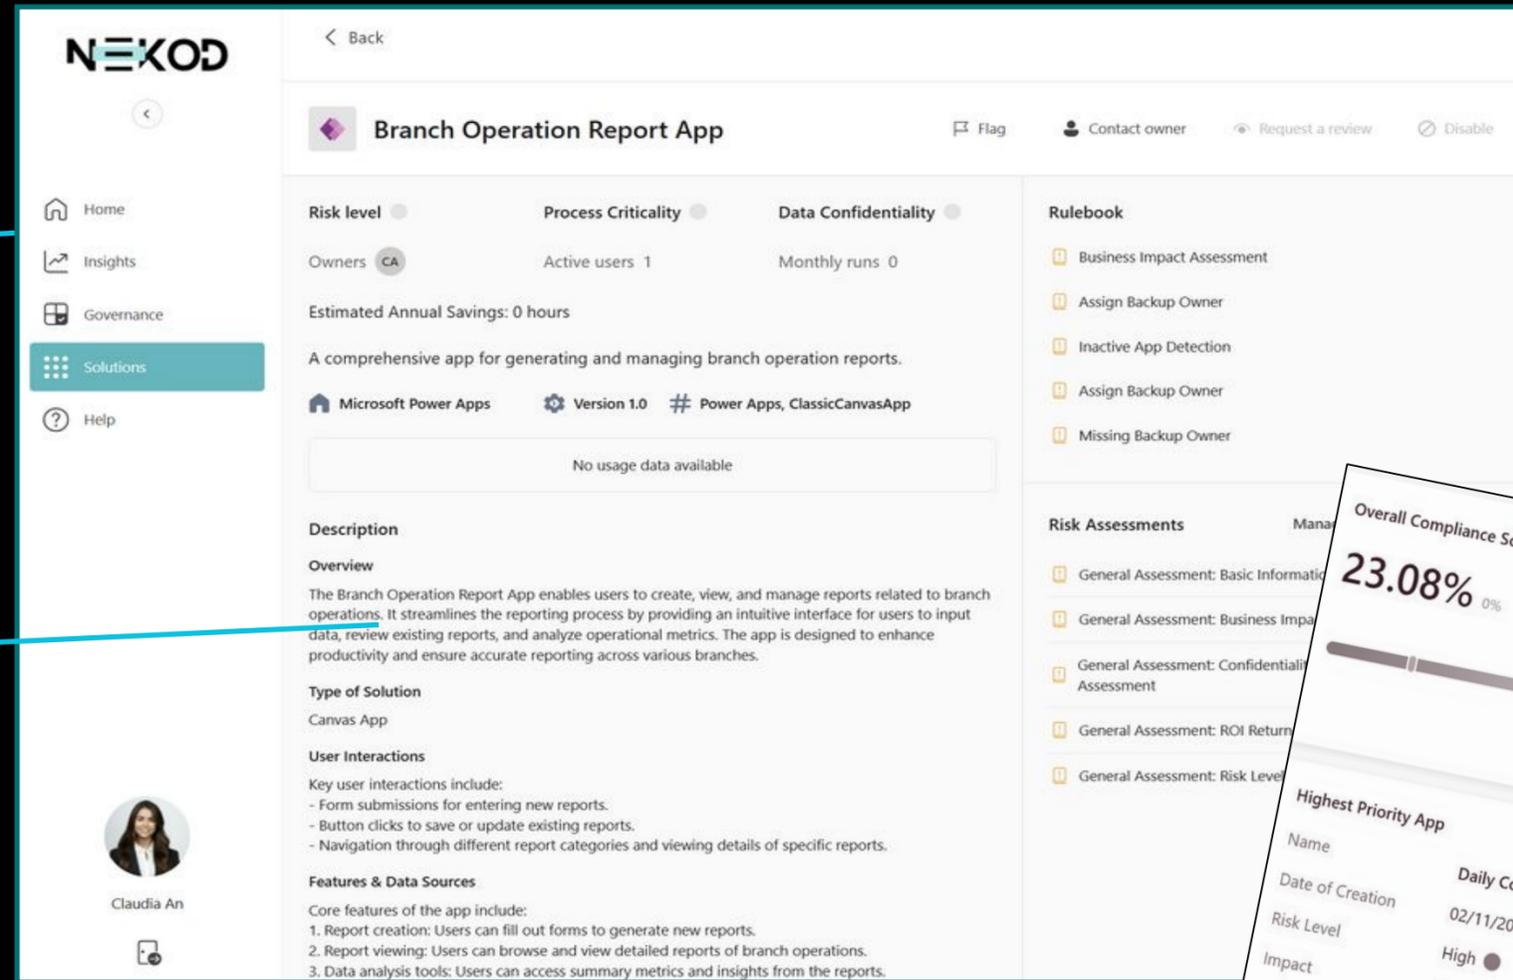

The bottleneck of bringing an app from **prototype to production:**

manual risk reviews, compliance audits and multiple layers of approvals cannot keep up with speed and volume of app development.

NEKOD is the **automated governance** layer for **vibe coded apps** in enterprise.

We instantly assess every app's benefit-to-risk ratio, providing a **shortcut to production**.

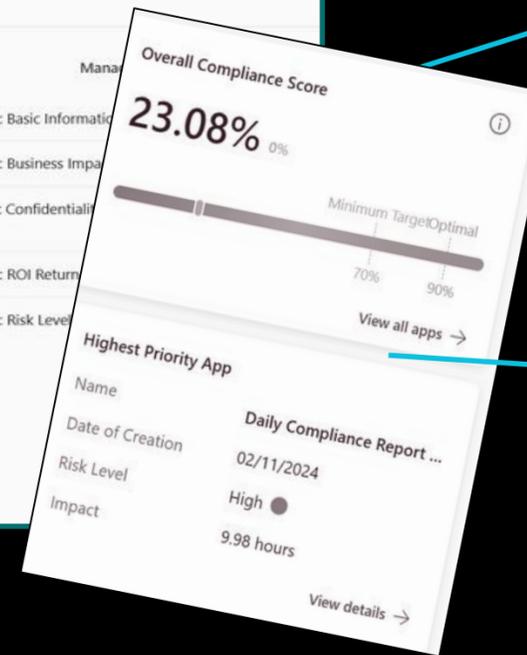

Integrated to internal apps

Auto-generated documentation

Tailored guardrails

Risk scoring with AI/ML

Vertical AI assessments

DevOps Tooling

The existing market. For engineers.

Vibe Coding

A new category. For non-engineers.

Designed for the new era of software.

Cross platform integration.

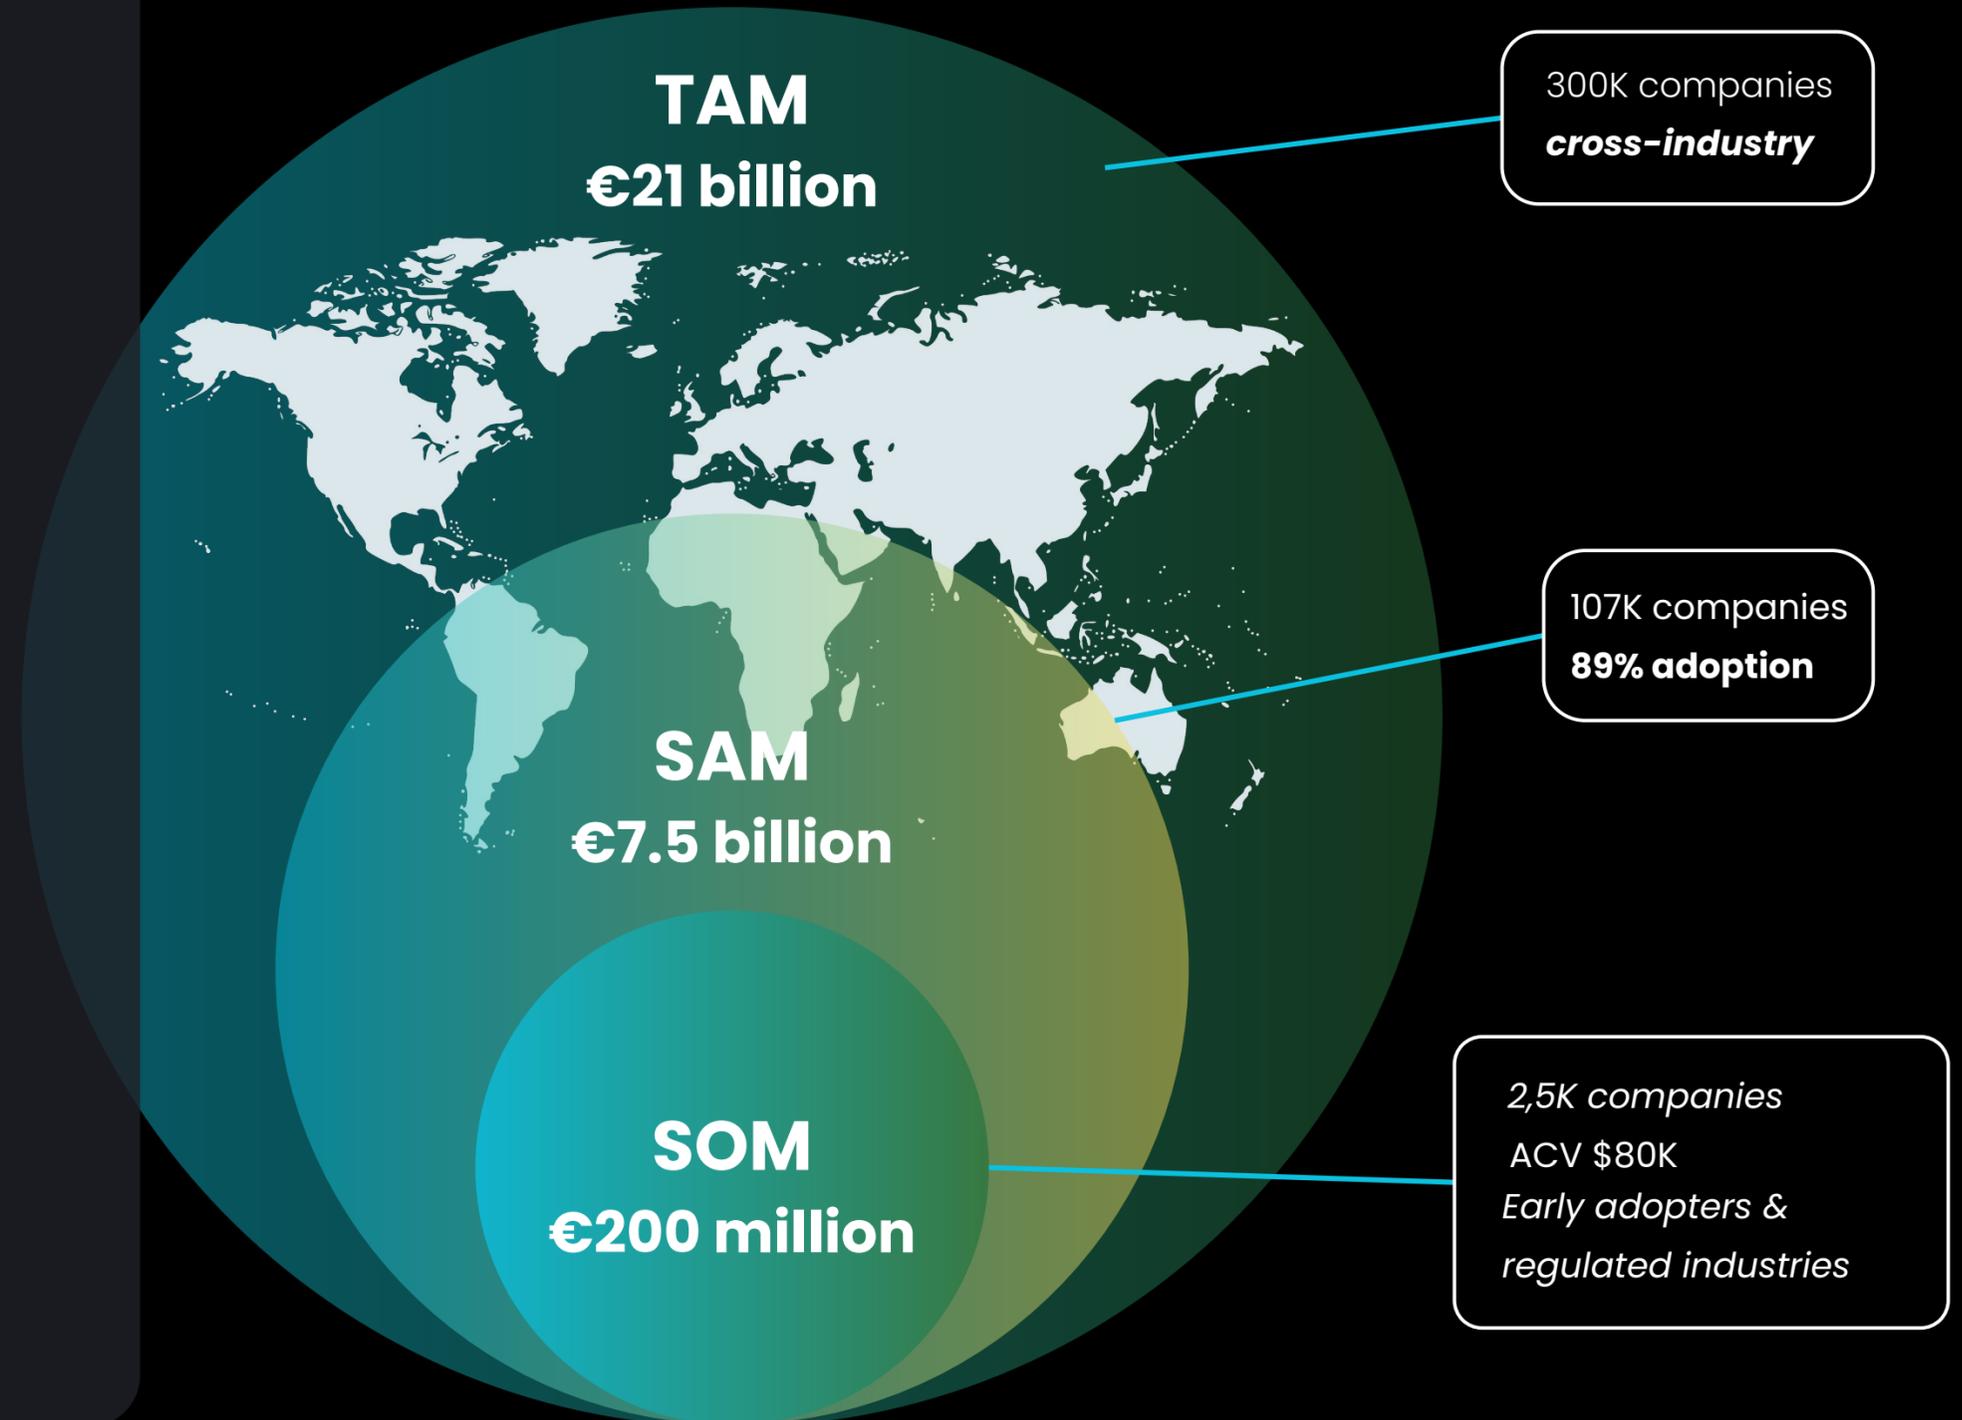

Industry verticals AI training.

At the intersection of 3 main drivers

Explosion of AI-generated apps

Increased regulatory pressure

Enterprise productivity mandate

We sell to CIOs & Automation Leads of *early* AI-adopters needing to balance innovation with control.

Smaller teams,
fewer apps
