Retool

Building with Assist

Nathan Hamill
Solutions Engineer

Retool is a developer-first platform for apps, workflows, and agents
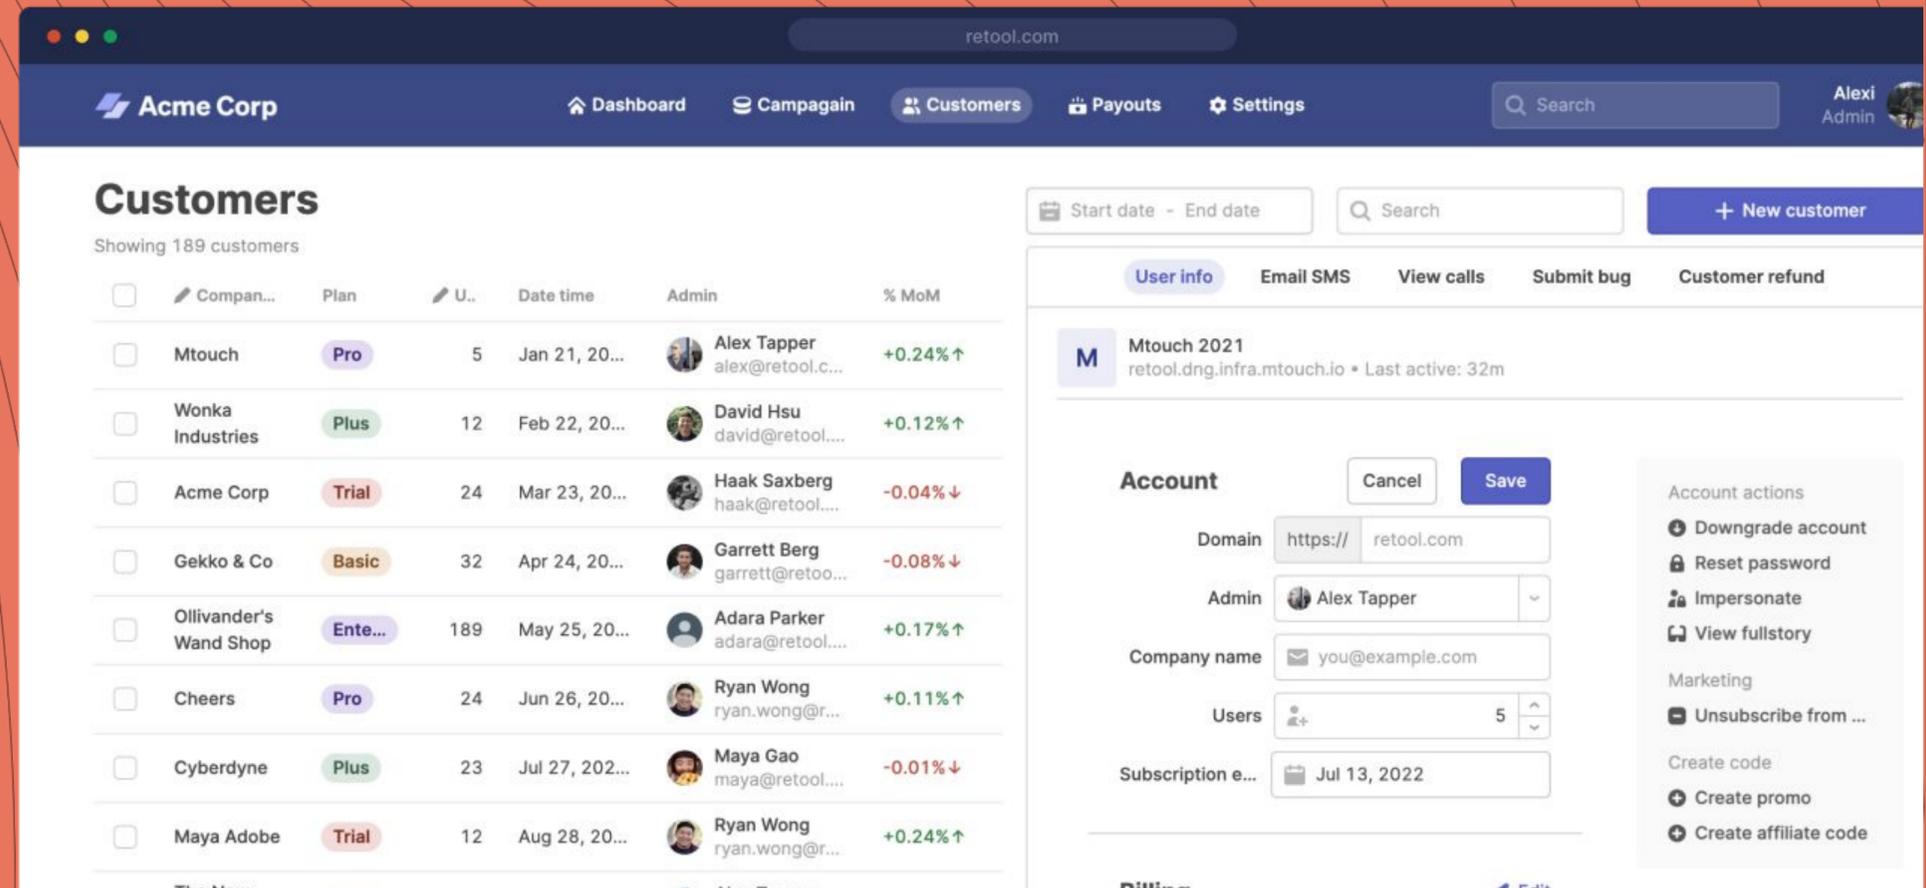

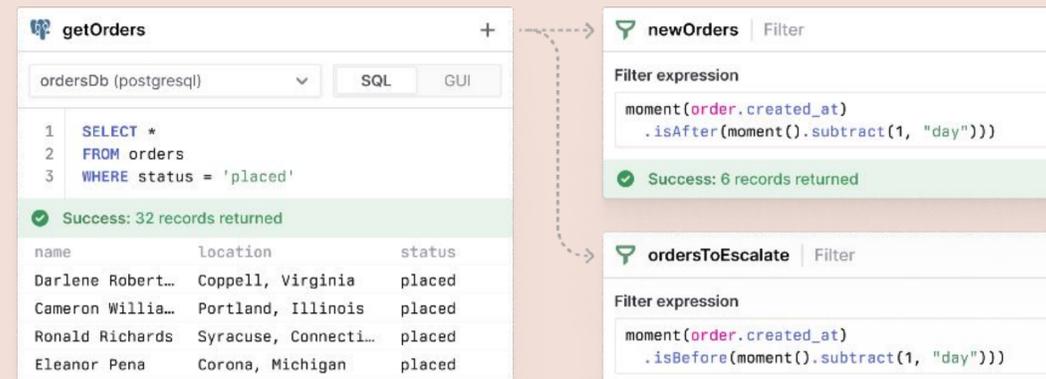

Read and write to your APIs or Databases

Drag and drop UI builder with 100+ pre-built React components

Write SQL, JavaScript, and Python with an AI copilot

Security and governance built-in

SSO AUDIT LOGS RBAC SECRETS MGMT

Integrate your SDLC with Source Control, Testing, Debugging, and Monitoring

Fortune 500s and startups use Retool as their application development platform for internal tools

amazon	TACO BELL	Mercedes-Benz	EA	snowflake	P&G	lyft	Quest Diagnostics
airbnb	nvidia	BOEING	ABInBev	DOORDASH	OpenAI	Pernod Ricard	BURGER KING
NBCUniversal	PROGRESSIVE	McKESSON	Orangetheory	AMERICAN EXPRESS	U.S. AIR FORCE	VOLVO	Moody's
Disney	Pfizer	stripe	RBC	Unity	experian	PHILIPS	Pinterest

500,000+ Internal Tools

Powering mission critical apps across businesses

Dashboards	Crud Apps	3rd-Party Portals
Backend Workflows	Native Mobile Apps	

$141M Raised

Funding from tier 1 investors

SEQUOIA   BOND   Y Combinator

Founders and executives from

stripe   PLAID   GitHub   ATLASSIAN

A trusted, developer-first platform

G2	Top 50 development products of 2024
Deloitte.	2024 Technology Innovation winner
Gartner	The only developer-first platform on the 2024 LCAP Magic Quadrant

Assist

What is it and how does it help?

Develop

→ Prompt to app

→ Fully HITL

→ Plan, approve, connect, build

Maintain

→ Update apps, components, and style

→ Call individual components or broader app structure

Document

→ Generate ReadMe and training steps

→ Full App Level analysis

Goal: Accelerate app development and idea to production timeline while maintaining best practices and limiting code sprawl on top of governed resources

Plan

What can you expect from today

Build from example prompt

Edit app via manual and prompt

Extend with advanced capabilities
➔   JS Transformers, Data Blending, and Design

By the end of the session you
will understand key Retool concepts and how to
co-develop with Assist
