Why agentic AI is rewriting the rules of time and talent

Erik de Muinck Keizer, VP EMEA North GLEAN

Debora Gallo, VP Talent Development MEWS

Superintelligent enterprises are using AI to...

1

Re-imagine the **customer experience**

2

Create an **operational advantage**

Superintelligent enterprises are using AI to...

1 Re-imagine the **customer experience**

51% of C-Suite execs expect AI to **deliver >5% revenue growth** in the next 3 years

But only 19% have seen that revenue growth to date

McKinsey
& Company

2 Create an **operational advantage**

>90% of C-Suite execs expect AI to **reduce costs** over the next 18 months

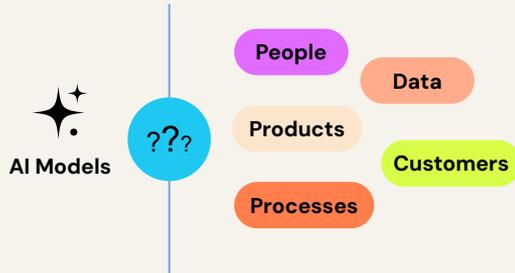

But <20% say they've seen tangible savings to date

BCG

The reality is AI transformation is hard

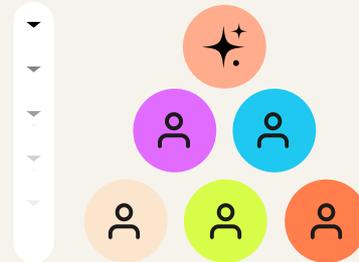

AI doesn't understand your business

How can it be useful if it doesn't know your company context?

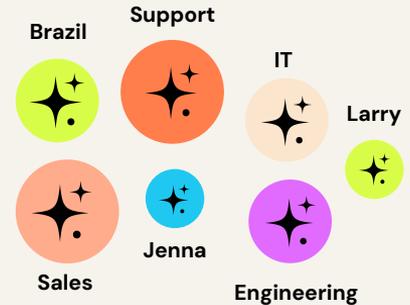

People resist change

...and driving all AI transformation top-down is too slow.

AI projects are popping-up everywhere

Builders are critical, but random acts of AI make security *and* ROI a challenge.

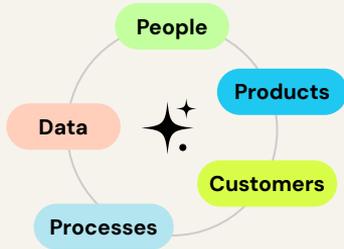

You can accelerate the journey to the superintelligent enterprise

AI doesn't understand your business

Connect AI to the context it needs

People resist change

Empower AI-first employees
